

## DENGUE AWARENESS PROGRAMME

Prioritising the raising cases of dengue and understanding the need for educating the general public about the causes, prevention and treatment of the same, the vibrant NSS volunteers of M.V.J College of Nursing gathered together at child development centre, Dandupalya, Hoskote on **14/06/2015** to create awareness about dengue fever among the general public of Dandupalya. An interesting health talk and slide show by Ms. Geetha, lecturer department of child health nursing created an awareness about dengue fever, its treatment and prevention among 100members including children who participated in the event. Overall, it was an enjoyable and learning experience for our students where they were able to contribute in their own way to help the local community and neighbourhood. Special thanks to Mrs. Omana, social worker at child development centre for supporting the NSS volunteers in gathering the public.
